Short descriptions of MetaLib features

Welcome to MetaLib

MetaLib is CSU's meta-database search tool. You can use MetaLib to search multiple databases simultaneously for electronic or paper resources.

If you are reading this screen, you are a guest user of MetaLib. As a guest user, you can search databases and download or email your search results. Be aware that off-campus guest users will only be able to access a small number of the resources and databases that are available to on-campus guest users. For all guest users, data that is sent to your e-Shelf or selected for personal resource lists will **not be saved** after you have logged off. To keep permanent records in MetaLib, you must log in to MetaLib as a registered user. This feature is not currently available. You will be able to log in to MetaLib using your CSU eID later this summer.

Click the following links for step-by-step information about how to

- Search multiple databases, image libraries, or library catalogs simultaneously
- Save search results to your personal MetaLib account (My e-Shelf)
- Build a "favorites" list of databases or resources to search (My Resource List)
- Locate and link to CSU's full-text e-journals
- Create a "favorites" list of e-journals (My e-Journals List)

For a more technical explanation of the MetaLib system, see [About MetaLib](#).

We want your feedback! Please [submit](#) your comments or questions about MetaLib.

If you are having technical problems with MetaLib, please [let us know](#).
