

Remember when. . .

you used to search Sage, then Medline, Biological Abstracts,  
Academic Search Premier, PsycInfo. . .

With MetaLib,

you can **search up to eight databases or catalogs at one time!**

Remember when. . .

you spent hours sorting through citations and removing duplicates . . .

With MetaLib,

you can **automatically remove duplicate records** from small sets

Remember when. . .

each time the library purchased another database you had to learn how it  
worked . . .

With MetaLib,

you use the **same interface to search each time!**

Remember when. . .

you lost that important citation a few months ago. . .

With MetaLib,

you can **save citations and search histories** for future reference

Remember when. . .

you were asked to track all new publications on a certain topic. . .

With MetaLib,

you will be able to **set up e-mail alerts** for multiple databases

Remember when. . .

you used to hunt around for all your favorite databases and journals. . .

With MetaLib,

you can **create your own personal resources lists** of e-journals  
or databases

**MetaLib is coming to CSU Libraries in the Fall of 2003.**
